

CALQUENCE® ON THE GO

## Travel Tips for Your Friend or Loved One

Sometimes your friend or family member will want to get away for a bit...even if it's just for a day or a long weekend. Travel has a way of changing anyone's daily routine, but it's still important to stay on track with treatment while away from home. Below are a few important reminders and tips to share.

### Tips for traveling while taking CALQUENCE

- ◆ Make sure your friend or family member has enough **CALQUENCE** for the entire trip
- ◆ If a full bottle of **CALQUENCE** will not be needed for the trip, suggest using an old **CALQUENCE** bottle to bring the right number of capsules, with a few extra in case the trip lasts longer than expected
- ◆ **CALQUENCE** should always be stored in a safe place and at room temperature (between 68°F to 77°F) and out of reach of children
- ◆ If the trip involves air travel, medicines should be kept in a carry-on bag to reduce the chance that they might get lost
- ◆ Patients should carry a list of all medicines and their doctor's contact information in case medicines get lost or stolen. You can download a helpful medication tracker on [CALQUENCEcarepartners.com](http://CALQUENCEcarepartners.com)
- ◆ Be sure your friend or family member travels with a valid insurance card and photo ID. Also, you may want to research potential healthcare providers and pharmacies at the travel destination, should they be needed
- ◆ Advise your friend or family member to talk with the doctor about whether there are potential health risks associated with traveling

BE SURE TO HAVE A CONVERSATION WITH THE HEALTHCARE TEAM OR PHARMACY ABOUT TREATMENT NEEDS BEFORE GOING ON A TRIP
